Introduction

Introduction

A. Background

Early Intervention is a coordinated family focused system that provides appropriate services for eligible infants and toddlers ages birth to 3 years who have special needs. The Department of Rehabilitation Services administers the Early Intervention System in the state of Alabama. The Early Intervention programs in Alabama serve approximately 3,000 clients each year. Prior to Fiscal Year 1999, the Alabama Department of Rehabilitation Services has assessed the level of client satisfaction by administering a mail-out client satisfaction survey in-house. Since that time the client satisfaction surveys have successfully been conducted utilizing telephone interviewing administered by Southeast Research, Inc. in Montgomery, AL.

B. Research Methodology

During fiscal year 1999, twenty-three (23) Early Intervention programs were evaluated in order to assure that families currently involved are receiving the service and assistance they need. A total of 600 families were involved in the programs under the Alabama Early Intervention System evaluated in fiscal year 1999. Four hundred and fourteen (414) families completed the family satisfaction survey by telephone. One hundred eighty-five (185) families could not be contacted by telephone because of "Unable to contact on at least 5 different days and times", "Wrong number", "Disconnected/Not in service", "Unpublished number", "No longer at this number", "Out-of-town for extended time", "Refused", "Spanish speaking only", "Hearing Impaired", "Social worker" or "No Phone". These families were mailed a family satisfaction survey, and forty-nine (49) of the surveys were completed by mail. All contacts with families involved with the Early Intervention programs were made between March and September 1999.

During fiscal year 2000, thirty six (36) Early Intervention programs were evaluated in order to assure that families currently involved are receiving the service and assistance they need. A total of eight hundred ninety five (895) families were involved in the programs under the Alabama Early Intervention System evaluated in fiscal year 2000. Six hundred thirty six (636) families completed the family satisfaction survey by telephone. Two hundred fifty nine (259) families could not be contacted by telephone because of "No Phone", "Disconnected/Not in service", "Wrong number", "Unable to Contact on at least 5 different days and times", "No Phone at Home", "Fax Machine", "Prefer Mail-Out", "Changed to Unpublished Number", "No longer at this number", "No Longer Involved", "No English", "Just Started", "Social worker", "Child is at Father Purcell's", "Moved Out of State", "Beeper Number", or "Refused". These families were mailed a family satisfaction survey, and seventy nine (79) of the surveys were completed by mail. All contacts with families involved with the Early Intervention programs were made between October 1999 and September 2000.

Page 1

During fiscal year 2001, thirty one (31) Early Intervention programs were evaluated in order to assure that families currently involved are receiving the service and assistance they need. A total of one thousand twenty-six (1,026) families were involved in the programs under the Alabama Early Intervention System evaluated in fiscal year 2001. Six hundred fifty-six (656) families completed the family satisfaction survey by telephone. Three hundred and fifty (350) families could not be contacted by telephone due to the following reasons: "No Phone", "Disconnected/Not in service", "Wrong number", "Unable to Contact on at least 5 different days and times", "No Phone at Home", "Already Completed", "Prefer Mail-Out", "Changed to Unpublished Number", "No longer at this number", "No Longer Involved", "No English", "New Referrals", "Social worker", "No Longer has Child", "Out-of-town for extended time", "Beeper Number", "Hearing Impaired", "Mother/Child in Hospital", "No Phone or Address listed/ Wrong", "Cell phone Stolen", "Asked not to Contact", or "Refused". These families were mailed a family satisfaction survey, and seventy-eight (78) of these surveys were completed by mail. All contacts with families involved with the Early Intervention programs were made between October 2000 and September 2001.

During fiscal year 2002, twenty-three (23) Early Intervention programs were evaluated in order to assure that families currently involved are receiving the service and assistance they need. A total of Seven hundred and eighty (780) families were involved in the programs under the Alabama Early Intervention System evaluated in fiscal year 2002. Five hundred forty-two (542) families completed the family satisfaction survey by telephone. Two hundred and thirty-eight (238) families could not be contacted by telephone due to the following reasons: "No Phone", "Disconnected", "Not in service", "Wrong number", "Unable to Contact on at least 5 different days and times", "Prefer Mail-Out", "Non-published Number", "No Longer Involved", "No English", "DHR", "Mother in Hospital", "Child in Hospital", "Child is sick", "Cannot receive incoming calls", "Cannot be completed as dialed", "Mother does not speak well", "Child just moved here", "Child turned 3", "Fax", "Never received services", "Has not started", or "Refused". These families were mailed a family satisfaction survey, and thirty-eight (38) of these surveys were completed by mail. All contacts with families involved with the Early Intervention programs were made between October 2001 and September 2002.

During fiscal year 2003, twenty (20) Early Intervention programs were evaluated in order to assure that families currently involved are receiving the service and assistance they need. A total of seven hundred and fifty-eight (758) families were involved in the programs under the Alabama Early Intervention System evaluated in fiscal year 2003. Four hundred and ninty-two (492) families completed the family satisfaction survey by telephone. Two hundred and sixty-six (266) families could not be contacted by telephone due to the following reasons: "No Phone", "No phone at home", "Disconnected", "Not in service", "Wrong number", "Unable to Contact on at least 5 different days and times", "Parents use ASL", "Prefer Mail-Out", "Non-published Number", "No Longer Involved", "No English", "Mother seriously ill", "Cannot receive incoming calls", "Cannot be completed as dialed", "Refused", "Does not live there". These families were mailed a family satisfaction survey, and sixty-two (62) of these surveys were completed by mail. All contacts with families involved with the Early Intervention programs were made between October 2002 and September 2003.

C. Contact Overview

TOTAL Completed	463	77%	715	80%	734	72%	580	74%	554	73%

D. Analysis of Survey Findings

The family satisfaction questionnaire utilizes 3 types of responses: two four-point rating scales; a Yes/No response scale; and open-ended responses (see questionnaire in section III of this report). The four-point rating scales used were: "Excellent", "Good", "Fair", "Poor"; and "Very Convenient", "Somewhat Convenient", "Somewhat Inconvenient", "Very Inconvenient". The values for the scaled response questions ranged from 4 for "Excellent" and "Very Convenient", to 1 for "Poor" and "Very Inconvenient".

All responses were then summarized and a percentage score was computed. The percentage scores are based upon a maximum of 100%.

The numbers in the composite report for the Alabama Early Intervention System differ slightly from the numbers in the individual reports due to an additional 6% in 1999, an additional 5% in 2000, an additional 4% in 2001, an additional 4% in 2002, and an additional 4% in 2003 completed mail-in surveys received after the deadline for each individual evaluation.

This report contains a summary of findings for the Alabama Early Intervention programs. For a complete analysis of the survey results, see tabular data section of this study available through the Division of Early Intervention.

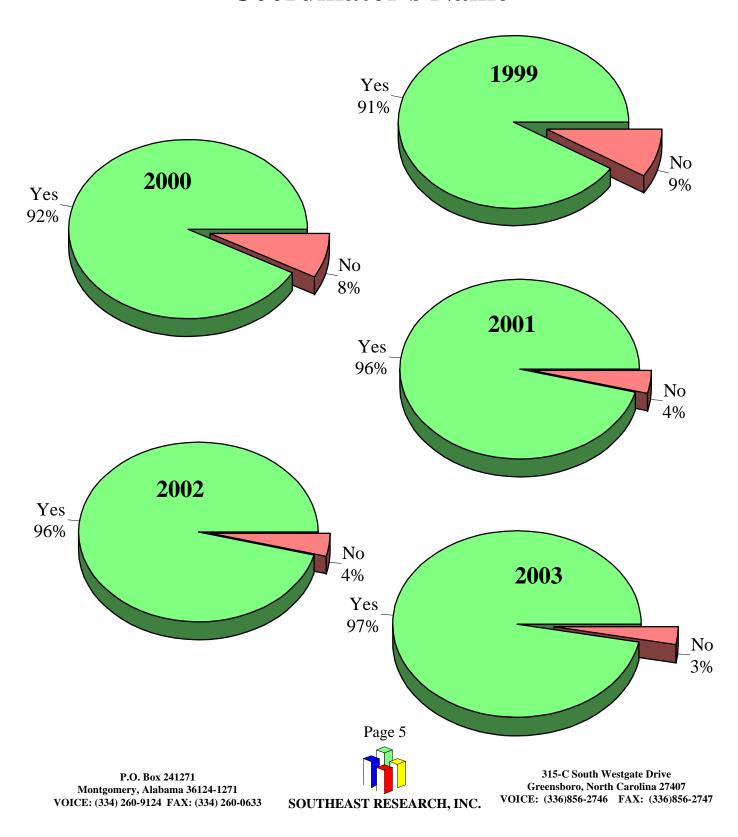

E. Notes on Year-to-Year Comparisons

When making year-to-year comparisons of the AEIS reports, it should be noted that the survey completion rates for FY 2001, FY 2002 and FY 2003 were slightly lower than the completion rates for FY 1999 and FY 2000. The PAR population for these years included a somewhat higher incidence of "No Phone Listed", "Wrong Number Numbers", and "Disconnected/Not in Service Numbers". As a result of this situation, the proportion of surveys mailed to members of the respective target groups was higher. While it is difficult to determine the reasons for the lower proportion of working telephone numbers among the groups surveyed in the last three years, the downturn in the state's economy may be a contributing factor. Additionally, it is important to keep in mind that the programs evaluated change each year, making it difficult to compare completion rates from group to group and from year to year.

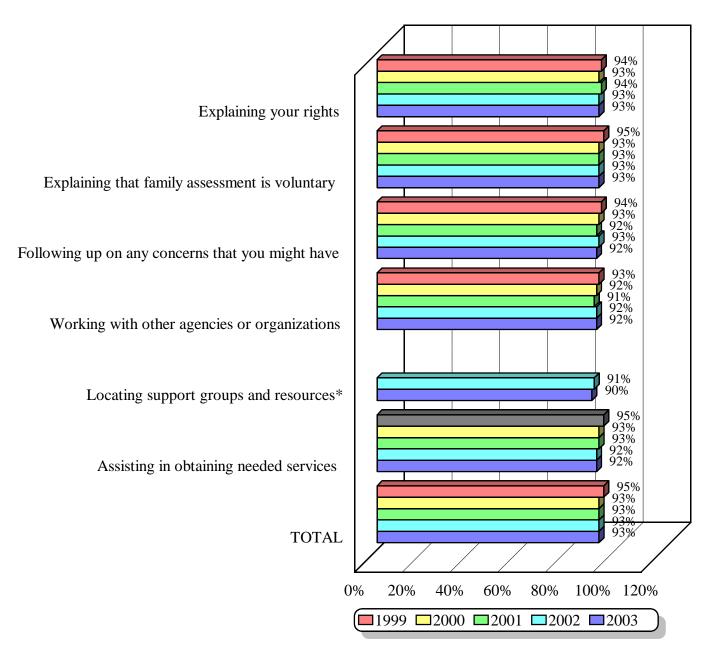

Summary of Findings

Families' Awareness of Service Coordinator's Name

Rating of Services Received from Service Coordinator at the AEIS Programs

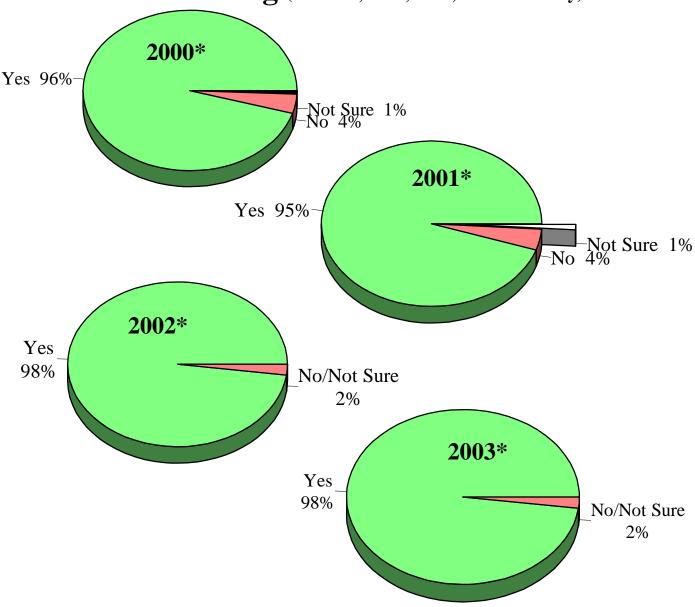

^{*} This question was asked in the FY 2002 and FY 2003 versions of the questionnaire only.

Chart 2A

Awareness that Child's EI Services and Supports Can Be Provided in A Natural Environment Such as Child's Home or Child

 $Care\ Setting\ (FY\ 2000,\ 2001,\ 2002,\ and\ 2003\ Only)$

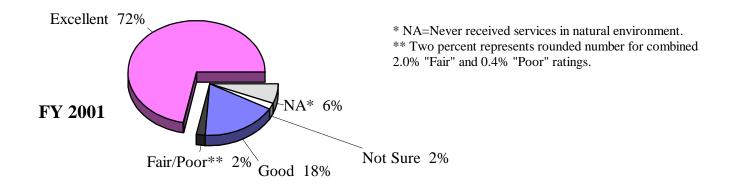

^{*} This question was asked in the FY 2000, FY 2001, FY 2002, and FY 2003 versions of the questionnaire only.

Chart 2B

Rating of Service Coordinator 's Assistance in Providing EI Services and Supports in the Child's

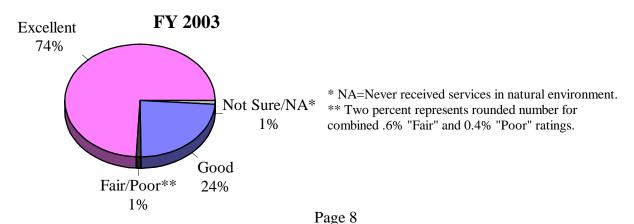

Natural Environment (FY 2001, FY 2002, and FY 2003 Only)

Chart 9A

Rating of Overall Early Intervention Experience

(FY 2003 Only)

Changes Families Would Like To See Made in Alabama's Early Intervention System

Top Suggested Changes (1999, 2000, 2001, 2002, & 2003)

Everything nice/fine

Extend age limit on programs

Public should be made more aware of services offered through AEIS

Child needs more therapy/services

Support group for parents with similar needs

Provide more funding

Need to get child in system faster/process too slow

Transportation

Like more interaction with other children

Parents need more explanation

Need more therapists

Like location closer to home

Like services done at home

^{*}Responses are listed in descending order of importance.

^{*}For a complete listing of reasons, see tabular sections of the studies available through the Division of Early Intervention.
